

# LED Cube Sconce RGBCW Wall Light Smart WiFi Waterproof IP65

**Smart outdoor aluminum wall sconce with app control, voice assistant support, and adjustable up/down beam effects**

Elevate outdoor spaces with a modern LED cube wall light engineered for patios, gardens, walkways, and exterior walls. The durable aluminum body and IP65 waterproof construction provide dependable year-round performance while the clean geometric design adds a contemporary architectural accent.

RGBCW technology allows warm white lighting and a full spectrum of vibrant colors for decorative scenes, ambience, and everyday illumination. Smart WiFi control through the mobile app plus Alexa and Google Assistant compatibility make color changes, dimming, grouping, and scheduling simple and convenient.

| Beam Angle             | Adjustable up/down 0-120 degrees         |
| Installation           | Wall mounted                             |
| Application            | Patio / garden / walkway / exterior wall |

## PRODUCT NOTES

- Smart control supports color selection, dimming, timer functions, grouping, and scene changes through the mobile app.
- The adjustable shutters allow narrow or wide up/down light beams to create custom wall-wash effects.
- Install on exterior walls with proper line-voltage wiring and reliable WiFi coverage for best smart-home performance.

# Application and Smart Control

## RECOMMENDED SETUP SEQUENCE

1

Mount the wall fixture securely and connect it to the compatible AC power supply according to local electrical practice.

2

Connect the light to a 2.4 GHz WiFi network and pair it with the Smart Life app on your mobile phone.

3

Adjust the up and down beam shutters to create the desired narrow or wide light pattern.

4

Create groups, set timers, choose colors or warm white scenes, and enable voice control with Alexa or Google Assistant.

## DESIGN GUIDANCE

- Use warm white for architectural accent lighting and RGB scenes for decorative ambience.
- Mount at consistent heights along facades, patios, garden walls, and entry zones for a balanced rhythm.
- Adjust the shutter angles to tailor narrow, medium, or wide up/down wall-wash effects.
- Verify IP65 outdoor placement and protect wiring connections from water ingress.
- For smart grouping, ensure strong WiFi coverage in all controlled zones.
- Use scheduling and dimming to combine security, convenience, and energy savings.

Installation should follow local electrical codes. Confirm power compatibility, WiFi coverage, and the intended lighting effect before final placement.

## PROJECT SELECTION GUIDE

## Specification and Selection

## PRODUCT DESCRIPTION

The LED Cube Sconce RGBCW combines a durable aluminum cube body, IP65 weather protection, integrated LED illumination, and smart WiFi control for modern exterior lighting projects. Adjustable up/down beam shutters allow narrow or wide lighting effects, while RGBCW color control supports warm white everyday lighting as well as vivid decorative scenes. App control, grouping, dimming, timers, and Alexa / Google Assistant integration make the fixture a flexible choice for residential and hospitality applications.
