

Square Anti-Glare LED Recessed Downlight Adjustable Ceiling Spotlight Single & Double Head Architectural Lighting

Deep recessed anti-glare optics, adjustable aiming, and single- or double-head configurations for modern architectural interiors

This square anti-glare LED recessed downlight is designed for modern residential and commercial interiors where clean aesthetics, visual comfort, and precise illumination are essential. The deep recessed reflector and narrow trim minimize glare while delivering focused light for accent and task use

COLOR

ANTI-GLARE REFLECTOR

INTERIOR APPLICATION

ADJUSTABLE RECESSED ARCHITECTURAL LIGHTING

Design and Installation

RECOMMENDED INSTALLATION SEQUENCE

1

Turn off power and confirm the selected single- or double-head model and required ceiling location.

2

Verify the fixture face size, ceiling depth, cutout, and wiring access before preparing the opening.

3

Complete the electrical connections, compress the spring clips, and insert the fixture until the trim sits flush.

4

Restore power, aim the adjustable module, and test the intended accent or task lighting direction.

DESIGN GUIDANCE

- Use adjustable aiming to highlight artwork, counters, shelving, retail displays, and architectural details.
- Deep recessed anti-glare optics improve visual comfort while maintaining focused output.
- Use the single-head version for precise point accents.
- Use the double-head version for broader or dual-direction coverage.
- Confirm ceiling depth, opening size, and wiring access before final installation.
- Select wattage and finish to suit the room, target surface, and required light level.

Installation should be completed by a qualified person. Verify electrical compatibility, cutout requirements, ceiling depth, and local code requirements before installation.

PROJECT SELECTION GUIDE

Specification and Selection

PRODUCT DESCRIPTION

This square anti-glare recessed downlight combines a deep reflector, adjustable aiming, and a refined architectural square trim to deliver comfortable, focused illumination. Available in single-head and double-head configurations with 7W, 10W, and 15W options, it is designed for modern residential and commercial environments where glare control, clean aesthetics, and flexible directional lighting are important.

The premium aluminum body, spring-clip recessed mounting, and white body with black reflector finish make it suitable for living rooms, kitchens, bedrooms, hallways, retail stores, showrooms, and offices.
